Subject: Letter Of Recommendation

To Whom It may Concern:

I have had the pleasure of working with Walt on various projects throughout this year. Walt always displays the utmost professionalism in everything that he does, on the job and off the job. No matter the situation, he is always has the customers success in mind.

Walt and his crew were the scaffold builders for Partytime/HDO Productions on numerous projects, the most difficult being the double decker floor that he built at the Fed EX Tournament in Memphis, TN. The difficulty in the build came with not a tough timeline, but having a true understanding of the amount of weight that this particular double decker structure put on an elevated floor. This was the premier of our double decker structure in the U.S., the only one that had a cantilever porch on the second level. Walt ensured, that the understructure was built to withstand the downward pressure of over 80kips per leg.

On other projects that have included CES, and Quicken Loans, Walt and his crew have always delivered the product on time. His continued professionalism no matter the circumstances makes him and his crew a pleasure to work with.

I would highly recommend Walt for any projects and hope to use him on many more projects as we continue to grow out own business.
